Sterile Sharps BinsFor Cytotoxic Waste

Our range of sharps bins has been extended to offer a wider choice for the safe disposal of cytotoxic contaminated sharps. Individually double bagged and sterilised for your convenience, the bins are clean, sterile and ready for use eliminating the need for excessive spraying and time consuming wiping.

All of the bins have needle and vacutainer removers ensuring greater protection for the operator, and the purple lids and labelling comply with DoH best practice guidelines for the safe handling of cytotoxic waste.

- + **0.6 Litre** Conveniently fits lead containers in radio pharmacy applications
- + **2.5 Litre** For pharmacy oncology units
- + **5 Litre** For cytotoxic manufacturing
